- Webalizer

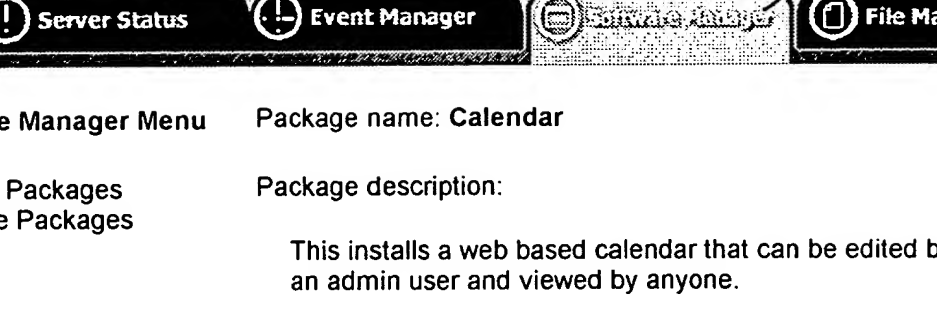

Web Development

- FrontPage
- Miva
- PHP

Webpage Decorations

- Analog Clock Applet
- Digital Clock Applet
- LEDSign Applet
- NavTicker Applet

Fig. - 1E

The screenshot shows the Plesk control panel interface. At the top, there is a navigation bar with icons and labels for 'Email Manager', 'User Manager', 'Web Manager', and 'Database Manager'. Below this, there is a secondary navigation bar with icons and labels for 'Server Status', 'Event Manager', 'Software Manager', and 'File Manager'. The 'Software Manager' section is active, displaying the 'Calendar' package. The package name is 'Calendar'. The package description is 'This installs a web based calendar that can be edited by an admin user and viewed by anyone.' Below the description, it states 'You have not installed *Calendar* yet.' There is an 'Install' button next to the package name. A handwritten note '139' is visible in the bottom right corner of the screenshot.

Mailing List Manager

The Mailing List Manager is an easy to use interface to the robust Majordomo mailing list program. You can allow people to subscribe and unsubscribe to your lists, or manage them manually. You can also send messages easily to your lists and optionally allow your users to send to them to, providing email based discussion forums.

These are the mailing lists currently on your server.
